

## Public lecture

# Animal welfare & ethics where does science end and ethics begin?

## Peter Sandøe

Professor of Bioethics  
Faculty of Life Sciences  
University of Copenhagen  
Denmark  
[www.animaethics.net](http://www.animaethics.net)

### A public lecture to challenge your thinking on ethical issues!

- Is there a clear distinction between animal welfare science and the ethical discussions about what is right and wrong in our dealings with animals?
- Does it matter how animal welfare is defined?
- What are the ethical assumptions affecting the study of animal welfare?
- Why do these assumptions vary depending on whether we're talking about farm animals or companion animals?
- How can researchers present results in a way that makes their ethical assumptions transparent?

### A stimulating discussion not to be missed!

#### Date

Friday  
2 March 2012  
12.30-1.30pm

#### Venue

Robertson Lecture Theatre  
Science & Computing Building  
Murdoch University  
90 South Street  
Murdoch WA 6150
