

WAVMA Aquatic Veterinary Education Programme

The conference and aquatic program seek to bring together individual involved with, or interested in current and future aquatic veterinary education throughout the world. In particular, interactive and didactic workshops will focus on new approaches and models for supplementing veterinary curricula, continued education & professional development, and life-long learning. Attendees will have the opportunity to discuss and conclude innovative approaches using Web 2.0 and other e-media, to fulfill a rapidly growing need for well qualified aquatic veterinarians, with the following objectives:

- To increase awareness and emphasize important developments in global aquatic veterinary education
- To illustrate advances in using NOVICE for training future aquatic veterinary practitioners

Thursday, October 4, 2012

- 11:45 A. David Scarfe **“International Approaches to Expanding Aquatic Veterinary Educational and day-One Competency”**
