

WORLD SUICIDE PREVENTION DAY 2012

*Suicide Prevention Across the
Globe: Strengthening Protective
Factors and Instilling Hope*

Western Australia

Suicide is one of the largest killers in Australia and yet it remains hidden and rarely talked about. Over the last 20 years suicide has claimed the lives of approximately 2,500 Australians a year. At this level, suicide claims more lives than the national road toll, assaults and murders and more than Australia's 'national' cancer – skin cancer. In Western Australia alone we lose approximately 245 lives each year, while nationally we lose an average of 7 lives each day.

To help prevent this tragic toll, we must learn how to respond to those in need.

Get to know the signs and how to help:

Sign 1: Discussing a desire for suicide, 'ending it' or plans to take one's own life.

Sign 2: Feelings of hopelessness, helplessness or worthlessness, including feeling that others would be 'better off if I'm not around'.

Sign 3: A sharp decline or change in mood and 'not acting like themselves' – this can also coincide with a decline in seeking social interactions and job absenteeism.

Sign 4: A number of mood identifiers such as: depression, insomnia, anxiety, panic attacks and impaired concentration and loss of rational thinking often accompany suicidal ideation or attempts.

Sign 5: A desire to 'tie up loose ends' – the compiling of a will or the sudden distribution of belongings to friends and family.

Sign 6: Increased and unusual risky behaviour including destructive drug and alcohol use.

Sign 7: Recent traumatic events or losses that create unresolved distress.

Sign 8: A mental illness combined with other signs.

Sign 9: A recent or past attempt to take their own life or harm themselves.

Every situation is different, but one or a combination of these signs may be indicative of imminent risk. Rather than avoid the issue, start a conversation.

You could save a life.

National telephone counselling services:

Lifeline: 13 11 14

Kids Help Line: 1800 55 1800

Suicide Call Back Service: 133 659 467

The Salvation Army Hope Line (bereavement support): 1300 467 354

Mensline Australia: 1300 789 978

Veterans Line: 1800 011 046

How to get help:

- Let them know your concern.
 - Ask the person if they are suicidal. They may be relieved that they can talk to you about it.
 - Listen without judgement.
 - Sensitively advise them to get professional help, support them through that process.
- Let them know your concern.
 - Ask the person if they are suicidal. They may be relieved that they can talk to you about it.
 - Listen without judgement.
 - Sensitively advise them to get professional help, support them through that process.

Seven facts about suicide:

#1: Suicide results from intense psychological pain.

#2: People who talk about suicide are at serious risk and should be taken seriously.

#3: People often give signs before they attempt suicide. Get to know these signs so you can recognise risk.

#4: Suicide can affect anyone regardless of age, gender, income, relationship status, education or ethnicity.

#5: Talking about suicide with a person will not put them at risk.

#6: Suicide is preventable and people can fully recover after feeling suicidal.

#7: A person who has attempted suicide once may be at risk of doing it again.

What is Western Australia doing to support and prevent suicide?

In 2009 the Western Australian Department of Health released the WA Suicide Prevention Strategy 2009 – 2013. The Strategy allocates \$13 million for state and community implementation of the strategy, and established the Ministry for Mental Health. Centacare Australia have been appointed to implement the strategy, guided and coordinated by the Ministerial Council for Suicide Prevention. The Strategy prioritises; improving the evidence base and understanding of suicide prevention, building individual and community resilience and capacity, coordination, targeted activities and implementing standards and quality in suicide prevention. Find the Western Australian Strategy at <http://wspd.org.au/resources>
